Product description:

YEDON LE is the matt version of ALPINAs new bike touring helmet. Not only is the shape innovative but also the plug-in mechanism for the backlight. This is integrated into the helmet shell by means of a silicon lip. This German-made helmet leads the way in safety as well as with its ingenious design: thanks to Run System Ergo Pro it will fit perfectly on any head and its lightweight Inmold construction means it will barely be noticeable. The fly mesh in the front air vents keeps unwelcome visitors away.
