Cube Attention SL blue´n´orange 2019

With the Attention SL we set out to create a new benchmark for value and performance. Borrowing inspiration and ideas from our high end race bikes, our designers selected a RockShox air sprung fork for the ultimate in easy adjustability and smooth, progressive bump swallowing performance. They added powerful hydraulic disc brakes and a 180mm front rotor for assured stopping in all conditions, and finished off with Shimano's slick-shifting and reliable Deore and XT 2x10 gears. It's all bolted to our light, agile, comfortable and adaptable 6061 aluminium chassis - and, because of our Size Split setup, there's an Attention SL to suit every rider.

Affordable it may be, but the Attention SL's 6061 aluminium frame - with mechanically formed top and down tubes - is anything but ordinary. Our design team sweated the details on this frame every bit as much as they do on our pro athlete bikes, right down to redesigning the rack and mudguard mounting system for 2019 to make a touring or commuting setup even easier to add. Everything from the internal cable routing to the integrated disc mount is designed to improve function without adding unnecessary weight. Multilayer paint means it'll take everyday knocks and scrapes in its stride without losing its good looks. And, as you'd expect from CUBE, our Agile Ride Geometry means the Attention SL has the same poised, balanced yet agile handling that you'd expect from any of our bikes.
