Cube Stereo 120 SL 29 smokyblue ´n ´lime 2019

Proving that you should never judge a book by its cover, the Stereo 120 SL 29's understated looks disguise its prodigious trail-taming abilities. By combining a brand new, lightweight and trail-orientated frame with fast-rolling 29er wheels and top drawer components, we've created an extraordinary comfortable, agile and capable off-road machine that'll handle anything you care to throw at it. It is, in many ways, a wolf in sheep's clothing. From the slick, sleek and reliable Shimano XT brakes and transmission to the Fox 34 Factory fork and DPS Evol shock - both with Kashima coatings for the ultimate in bump sensitivity - we've selected only the best parts to pair with our design team's latest masterpiece. A CUBE dropper post for those tricky, technical descents and light, strong Newmen wheels to keep you rolling complete the setup. Whether you like to ride multi-day adventures or just enjoy singletrack blasts on your home turf, the Stereo 120 SL 29 has got your back.

Which is more important - looks or performance? If you were to ask the CUBE engineering team, they'd probably tell you that each is as important as the other. The Stereo 120 SL 29's elegant appearance is certainly no accident. It combines hydroformed, triple butted aluminium tubes with advanced Efficient Trail Control kinematics and completely revised Agile Trail Geometry to stunning effect. From the way the seatstays flow seamlessly via the rocker linkage - complete with hidden pivots - into the top tube, to the torture-testing we undertake in our own lab to measure ultimate strength and stiffness, every millimetre of this frame has been finessed to extract the very best performance and looks. Internally routed cables even include stealth dropper post routing. But we don't want you just to admire the looks - we want you to ride it. Because we're confident that you won't want to stop...
