

# Cube Access WS iridium ´n ´berry 2019

**Product price:**

**399,00 € tax included**

**Product attributes:**

Frame Size: 17", 19", 16", 13,5"  
Radgröße: 29", 27,5"

Gender: Female  
Application area: Hardtail  
Frame: Hard Tail

## Product description:

Cube Access WS iridium ´n ´berry 2019

When you've got the urge to explore off-road, you'll want a bike that's up to the task: comfortable, reliable and easy to handle. That's why we developed the Access. Like all of our female-specific bikes, it's a complete tailored package with the emphasis on all-day comfort, responsive but stable handling, and safety you can depend on. We paid special attention to the geometry, saddle, stem length and handlebar width - so that every ride is a pleasure, not a chore. Mechanical disc brakes give you the power you need to stop safely in any conditions, while 24 slick-shifting Shimano gears mean you're just a click away from tackling any trail. There's even a Suntour suspension fork to take the sting out of the trail and the edge off potholes and bumps. And, with our Size Split setup, there's an Access to suit any rider. It's got everything you need and nothing you don't - just get out and enjoy the ride!

Our designers pride themselves on understanding what each CUBE rider wants from their bike. For the Access that means a comfortable fit and ride, with the reassurance of the safety that you'd expect from CUBE. So we used our Compact Agile Ride Geometry to serve up a ride that's inspirational when you want it, and stable when you need it. Lurking beneath the carefully applied colour scheme - which uses a multi-layer wet paint process, so it'll keep its looks through the rough and tumble of everyday life and off-road adventures - are lots of neat touches. An emphasis on standover clearance ensures that every rider has the confidence to ride off-road, and we updated the mudguard and luggage carrier mounting points for 2019 to make them even neater and easier to use. New integrated cable routing complements the frame's great looks, while keeping gear shifts smooth and brake power consistent with significantly less maintenance. And the revised, complex section downtube is the stiff, strong and light backbone that the Access needs to respond to every pedal stroke or change of direction with instant, confidence-inspiring agility.

- 
- **frame** Aluminium Lite, AMF, Internal Cable Routing, Easy Mount Kickstand Ready
  - **colour** iridium ´n ´berry
  - **size**Size Split: 27.5: 13,5", 16" // 29: 17", 19"
