

# Cube Cubie 180 SL red´n´green´n´black 2019

**Product price:**

**329,00 € tax included**

**Product attributes:**

Wheelsize: 18 Inch  
Frame: Hard Tail

## **Product description:**

Cube Cubie 180 SL red´n´green´n´black 2019

The all new Cubie 180 brings the V brake system of a real mountain bike to a perfectly proportioned, lightweight aluminium frame designed especially for budding little rippers. With features like the complex profile down tube borrowed from our adult range, you can be sure that this is a real mountain bike... just in miniature form. An aluminium fork complements the frame perfectly, and we've carefully selected the components to provide a comfortable fit and perfect function for young riders. From new width CUBE tyres to the brake levers designed for small hands, we've taken care of all the details. A singlespeed setup means all that's needed is to get on and pedal, while a Hebie Chainlooper encloses the chain and keeps it away from your youngster's legs.

Kids may be small, but they're capable of giving a bike frame a really hard time simply through their enthusiasm, energy and the process of learning by making mistakes. The Cubie 180 takes its cue from its adult counterparts, blending lightweight aluminium tubes into a stiff, svelte and strong structure that's built to take everyday knocks and scrapes in its stride. There's plenty of clearance for our new CUBE tyres, and we've fitted V brake bosses front and rear so your child can learn how to control their speed with proper, 'grown-up' brakes. It's every inch a real mountain bike, just stripped down to the bare essentials.

- **frame** Alu Lite 6061
- **colour** red´n´green´n´black
- **size** 18"
- **fork** Rigid Alloy fork
