Cube Reaction Hybrid Pro 500 black edition 2019

We designed the Reaction Hybrid Pro so that you could get more out of the trails that you ride. More miles, more time, more fun: exactly what you'd expect from a Bosch CX e-bike built by CUBE. With its plush, accurate-steering Suntour suspension fork and light, grippy and comfortable Schwalbe 2.6 inch tyres to keep you on track, this is a bike that will help you tame any trail. The Shimano Deore 10 speed transmission puts a gear for any eventuality at your fingertips, and powerful Shimano MT200 hydraulic disc brakes ensure that you're always in control. Expand your off-road horizons - from the first pedal stroke to the last, the Reaction Hybrid Pro will help you on your way.

Building a great e-MTB involves more than just bolting a battery and motor to a frame. Our engineers understand this, which is why they put so much time and energy into crafting the Reaction Hybrid Pro's chassis. Slotting the motor into the ideal position for efficient power transfer and placing the battery inside the elegant lines of the down tube, they've created an e-bike that rides as good as it looks. The combination of our Agile Ride Geometry and a low centre of gravity gives this hybrid hardtail handling that'll surprise you - balanced and sure-footed when you need it; agile and lively when you want it. We've not forgotten practicality, either. Internally routed cables reduce maintenance and allow for a dropper post upgrade, while the battery can be charged without removing it from the frame. We sweated the details, so you can concentrate on the ride.
