Cube Stereo Hybrid 120 HPC SL 500 pinetree ´n´orange 2019

Take the proven comfort and control advantages of our Stereo Hybrid 120 line, add our advanced Twin Mold carbon manufacturing technology, and what do you get? A trail-orientated Bosch e-bike that's lighter, stiffer, more comfortable and more versatile than ever, that's what. Say 'hello' to the Stereo Hybrid 120 HPC SL - your new best friend for trail exploration. No climb is too steep, no descent too tricky. The Fox 34 Rhythm fork, paired with a Float DPS EVOL shock, makes short work of rocks, roots and trail debris. An 11 speed Shimano SLX and XT gear setup works in harmony with Bosch's powerful CX drive unit to put you in complete control, while strong hydraulic disc brakes ensure you can keep your speed in check at all times. With Newmen finishing kit and big volume, grippy Schwalbe Nobby Nic tyres, we've ensured that you've everything you need to explore further afield, more often.

The Stereo Hybrid 120 HPC SL's beauty is more than skin deep. The one-piece carbon down tube that houses the Bosch battery and drive unit is undeniably elegant, protecting the entire Bosch system from the elements and prying eyes. But it's also the stiff, exceptionally strong backbone that enabled our engineers to build such amazing handling and comfort into the frame. Combined with the 12x148mm Boost rear axle and tapered head tube, it delivers incredibly precise steering and efficient power transfer. A longer head tube and higher bottom bracket increase both comfort and ground clearance, which translates into longer, more adventurous rides. Our Efficient Trail Control suspension and Agile Trail Geometry work in tandem to deliver exceptional comfort and intuitive handling, whilst stealth dropper post-ready cable routing and maintenance-reducing internal gear cables are the kind of neat touches you'd expect from CUBE. We sweated the details,

so you can just concentrate on the ride.
