Product description:

There are times when only the best will do - and we're here to tell you that this is one of those times. The Access Hybrid SLT encompasses everything that we know about building light, great handling hardtails for women... with the added power of Bosch's superb CX drive system and a stunning selection of premium components. Fox's smooth, precise-steering 34 Rhythm suspension fork works in harmony with the frame's accurate steering and Schwalbe tyres' tenacious grip to deliver trail-taming comfort and grip. Meanwhile, the Bosch drive system and Shimano XT 11 speed transmission components get your pedal power to the trail across a huge range of gears, putting every climb within your reach. Newmen cockpit components are designed to add ride-long comfort, and powerful Shimano hydraulic disc brakes ensure you're always in control. There's no better Bosch e-mtb for women... and no better way of expanding your trail riding horizons.

We know what you're thinking: the Access Hybrid SLT doesn't look much like a Bosch e-bike. That's because our talented design team have gone to extraordinary lengths to incorporate the sophisticated Bosch CX drive unit and PowerTube battery into the lines of the frame's tubes, giving this bike an appearance that's as subtle as it is elegant. But it isn't just about looks. The one piece, gravity cast down tube that houses the battery, for example, forms a massively stiff and strong backbone for the frame. Combined with a tapered head tube, a Boost rear axle and our Agile Ride Geometry, it means that the Access Hybrid SLT has handling that's always confidence-inspiring, agile and safe, no matter what the trail throws at you. Internally routed cables and the battery are safe from dust, dirt and water, but you don't need to remove the battery from the frame for re-charging. We even had room to add a bottle cage mount, so you can take more fluids to stay hydrated on longer rides. And all of this attention to detail is for one purpose only: to ensure that you can focus on the ride.
