## **Product description:**

Cube Town Hybrid EXC 500 blue ´n´blue 2019

With the Town Hybrid EXC we set out to build a Bosch e-bike for comfortable everyday use: for work, for shopping, for fun. Available in easy entry, trapeze and classic men's frame configurations and in a wide range of sizes, there's one to suit everybody. Shimano's smooth-shifting 8 speed Nexus hub gear system works seamlessly with the Bosch Active Plus drive unit to make light work of any journey, whether across town or in the countryside. Hydraulic rim brakes deliver safe, assured stopping in any weather conditions, while the fully enclosed chain and full length mudguards help keep splashes and spray at bay. The integrated luggage carrier is a CUBE work of engineering art, combining elegant looks with incredible functionality for easy, secure load carrying. The RockShox Paragon Gold air fork lockout helps smooth out even the most potholed of city streets, and we included front and rear lights and a kickstand so that all you need to do is step aboard and ride. Smooth, reliable, adaptable and incredibly easy to live with, this is the Bosch e-bike that'll slot seamlessly into your everyday life.

Why create three different frames for the same bike? Because we like to make sure that every rider is catered for, that's why. The Easy Entry is as easy to use as its name implies, offering the easiest access in a frame that's still light, stiff and stable. The Trapeze option features traditional styling and straightforward step-through access, while the classic Men's frame is an instantly recognisable classic. Each has been carefully configured to combine the best blend of low weight, easy handling and more than enough strength to sail through our strict in-house testing regime. The Bosch drive unit's location in a custom gravity cast housing harnesses its power safely and effortlessly, while the battery is positioned in the optimum place to ensure the best possible handling. Speaking of

---

which, you can rely on our Comfort Ride Geometry to make you feel at home every time you ride, ensuring that you'll be safe and secure whether you're riding across town out in the countryside. We even routed cables internally, complementing the frame's elegant looks and keeping your gear shifts effortlessly smooth for longer.
